	2.1	Installation	.1
	2.2	Authorization	.2
	2.3	Uninstall ACS	.2

1.0 System Requirement

1.1 Checking before installation

Version of Revit and this MEW Check Plugin must be the same. For example, if Revit is in 2018 version, MEW Check Plugin should also be 2018 version.

ALWAYS ensure your window is set to automatic update, otherwise the plugin may not be able to function properly.

2.0 Setting Up

2.1 Installation

Login as administrator, copy setup.exe to your computer then double click the file. Follow the setup wizard and the programme "MEW Check" will be installed at C:\Program Files (x86)\MEW Check@Revit release year\ automatically.

2.2 Authorization

Select Update_Revit.exe in C:\Program Files (x86)\MEW Check@Revit release year\ UpdateRevitPlugin\, right click, and then select "Run as administrator". MEW function will be added to Revit.

Start Revit, confirm to always load MEW function. Select Add-ins under Contextual tab and select External Tools under Ribbon to check if new tools for MEW Check are installed. To test whether the tool can run popularly, open any file then refer to user manual under C:\Program Files (x86)\MEW Check@Revit release year\ to test if the function can be run properly. Contact us if it cannot.

2.3 Uninstall

The current version does not support uninstallation. If you want to uninstall the tool, follow the below steps:

 Delete files MEW Check.addin. For Windows XP, the file is located under C:\Documents and Settings\All Users\Application

Data\Autodesk\Revit\Addins\release year\. For Windows Vista and 7, the file is located under C:\ProgramData\Autodesk\Revit\Addins\r elease year

• Delete folder C:\Program Files (x86)\MEW Check@Revit release year\.

This removes the tool from your computer.
